

2024/2025

Cold coffee? We can do that, too! Thanks to our new Chilled Brew feature in the special model NIVO 8107. We developed this feature with the help of coffee experts. It enables coffee and espresso to be made at cooler temperatures. Through a process that brings out a variety of aromas from each coffee bean. For straight Enjoyment or over ice. This is not only perfect for summer, but also for coffee cocktails in the autumn. Once again, our developers have advanced our aroma technology further. With a unique result. In a fully automatic coffee

machine that sets new standards. Let yourself be surprised at how indulgent and special chilled brew can be - at one of the more than 2,000 NIVONA specialist retailers throughout Germany.

For Everyone Who Loves Coffee

Four answers about the Aroma Balance System from our coffee expert Kai Wolf

What is the Aroma Balance System?

This system allows you to influence the brewing process. Imagine: You can choose whether your NIVONA brews the coffee like Grandma's good old coffee machine or like the portafilter at an Italian café.

What do the profiles mean? The profiles are the different brewing processes that you can choose from. The names describe how water and ground coffee behave in relation to each other.

Does that really make a difference?

Oh yes! Try an espresso with the *dynamic* profile and then an espresso with the *intense* profile. By the way, that doesn't mean that one of the profiles should taste better than the other. Your taste alone decides. You simply get completely different aromas from the coffee beans at different intensities.

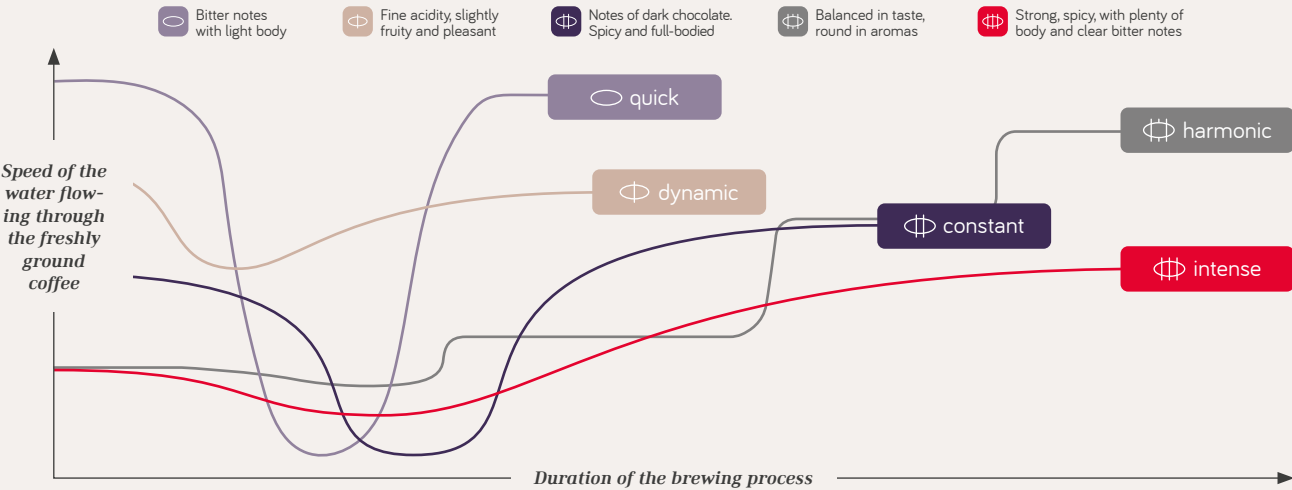

Who came up with that?

We spent several years developing our Aroma Balance System along with experts and baristas. It was important to

us that everyone gets their very favorite coffee with their NIVONA.

This is what the Aroma Balance System produces from our Espresso Milano, for example:

Let Your Palate Be the Judge

Cappuccino, latte macchiato or caffè latte: We love this combination. Coffee and milk simply belong together. And we are not alone in this belief. One in four Germans drinks cappuccinos regularly - and especially likes to do so when working from home.

But how do you make the perfect foam? In our fully automatic NIVONA coffee machines, different SPUMATORE work for your pleasure. But they have one thing in common: creamy, delicious foam.

This requires milk with the appropriate protein content. The more protein, the better it froths. When it comes to using milk alternatives such as oat, pea or soy milk, we recommend the barista version of the corresponding product. These froth better and more reliably.

You can get your cappuccino at the touch of a button from our 7 series onwards. From these models you also get the Cappuccino-Connaisseur feature. You can choose whether the milk or the coffee goes into the cup first. For baristas, the coffee comes first. This way, the milk wraps around the coffee when added. But we don't set any boundaries - give it a try.

Click Click Coffee

The CUBE 4' is the new, modern way of making coffee. Here we combine the technology of fully automatic coffee machines and portafilters with the compactness of a capsule machine. All together in one small coffee machine.

For coffee and espresso of the highest quality. Thanks to the

patented and automatic tamping and brewing pressure adjustment. And all this in a compact and triple award-winning design. The innovative Click Cup allows you to grind and brew. The coffee grounds are then disposed of easily with a simple twist.

- Espresso
- Coffee

Freshly Ground.
Because It's Simple and Better.

Capsules and pads? They're not necessary. Because an extra step is required to produce them. After all, the coffee has to get in there somehow. That step requires energy and raw materials that can be saved. With the CUBE 4', everyone can enjoy freshly ground coffee. Anywhere and regardless of the system. So you can enjoy the full range of any coffee from any roaster.

VS.

4 Reasons
Why the
CUBE 4' Is
the Perfect
Coffee Ma-
chine for
Vacation

1. Coffee Enjoyment
as it should be:

With the CUBE 4', any coffee bean can be selected and ground. In addition, the aroma profile, grinding quantity and temperature can be adjusted to get the best out of every coffee.

2. Fits in
any corner:

The CUBE 4' comes in compact dimensions. (Only slightly larger

than a folded napkin!) So there is space for it in any mobile-home kitchen or holiday accommodation.

3. Simply
sustainable:

With the CUBE 4', no additional waste is created by dividing the coffee portions. Simply twist the Click Cup after making the coffee and the used coffee grounds fall right out as a solid puck.

4. This is how you
carry it today:

The Travel Bag is available as an accessory for the CUBE 4', a perfect case to store it in on any trip.

Personal Coffee Coach

The 5 series is your introduction to the world of coffee at the touch of a button on a fully automatic machine. Coffee and espresso can be prepared easily using the TFT colour display. Even two cups at the same time. More than good value. Don't just drink a cup of coffee, experience your favorite coffee with all your senses. And if you want a latte:

With the manual SPUMATORE you can easily steam the milk. ———

Milk Steamer

The 6 series from NIVONA is characterized by one thing in particular - its signature foam. It is the ideal companion for anyone who loves latte drinks. Thanks to its intuitive design, a cappuccino is easy to make. In comparison to the previous models, the manual EASY SPUMATORE is located directly in the spout. No more pushing the cup! Just acti-

vate the valve and enjoy the foam. The Aroma Balance System plays an important role in the 6 series. Thanks to the three different profiles, you can brew your coffee the way you like it. -

A cappuccino straight out of Italy

Feels like Florence: With the models in the 7 series, you can make cappuccino and latte macchiato at the touch of a button. Simple and quick. And in addition to the Aroma Balance System, there is also a special aroma technology at work here: Thanks to the Cappuccino-Connaisseur, you can choose what goes into the cup first: coffee or milk? Baristas pull

the coffee first so that the milk wraps perfectly around the coffee when added. But we leave it up to your preferences. Set it up the way you like it.

Coffee Enjoyment for those special moments

The 8 series has been with NIVONA for many years. These fully automatic coffee machines are designed to make two cappuccinos or latte macchiatos at the same time at the touch of a button. Which is why they are among the most popular models in our range. Everything in the classic NIVONA design. On the inside, our aroma technology contrib-

utes to making your favorite coffee - with the Aroma Balance System and Cappuccino-Connaisseur. On the outside, high-quality material such as the stainless steel front of our current NICR 825 meets the renowned and intuitive NIVONA operating system. With the Big Picture Mode, symbols and fonts on the display screen can also be quickly modified.

Today's future. Tomorrow's standard.

Fully automatic coffee machines can do a lot. But only the 8000 series brews and cleans at the most advanced level possible today. Thanks to a new brewing unit. This means that coffee can be prepared in different ways. With a cleaner interior than ever before. And coffee satisfaction on a whole new level. Also thanks to the new harmonized

aroma profile. It ensures a balanced flavor from any coffee bean. With the additional features of the aroma technology, the knowledge of our baristas can be tapped into. At the touch of a button. All within one excellent design.

Pearl Blue

Discover
Chilled Brew
with the
special model
NIVO 8'107

Hot-Cold Coffee Enjoyment

The special model NIVO 8'107 delivers even more ways to enjoy coffee right to your kitchen. With the Chilled Brew function, espresso, coffee and caffè americano can be made at a cool temperature. This new brewing process releases special aromas from each coffee bean, which ensures a more complex flavor. The inspiration for this brewing

process comes from cold brew, a kind of coffee that is brewed cold or at room temperature. However, using the traditional cold brew apparatus, this takes up to twelve hours. Who has that kind of time? That's why the NIVO 8'107 takes a slightly different approach to the brewing process. And still serves up a rich coffee experience.

Espresso			Caffè latte

 Also available in a chilled version

Coffee in the comfort zone

What stands out the most in our 9 series? The especially large, clear touch screen. Inspired by the feel of high-quality hi-fi appliances, the two devices can be operated not only via the display, but also using the rotary dial. Everything is perfected with the NIVONA concept including animations that show what is happening in the fully automatic machine at every moment.

The Aroma Pre-Select app integrates even more barista knowledge into the machine: Now you can transfer our barista's recommendations for the three NIVONA coffee varieties directly to the machine. You can even upload your favorite picture as a lock screen. –

NICR 10'40

Titanium/Chrome

Employee of the month. All year round.

The NICR 1040 is the fully automatic coffee machine for the office. Designed to make up to 65 cups a day and with a special feature: easyclean*. For quick and easy cleaning of the SPUMATORE OneTouch DUO milk frother when colleagues want to draw another cappuccino. The double milk hose can get blocked with use, so it cleans itself after a set

time. Steam and water fall directly into the drip pan. Just like that. The NICR 1040, complete with its Quantity and Quick-Profile functions, offers an exceptionally efficient coffee experience.

Milk Lance NIML 220

The NIVONA milk lance is the practical method of getting the milk directly into the NIVONA. How? Very simple.

- Place the NIVONA milk lance in the carton
- Place the milk hose of the NIVONA fully automatic coffee machine into the adapter of the milk lance
- Done!
- After being used it can be put right into the refridgerator. Until it's time for the next cappuccino.

Accesso- ries for Milk Preparation

Cooler/Milk Refridgerator NICO 100

Optimally cooled at any temperature. Our milk cooler keeps the milk fresh for cappuccinos and other latte beverages. Fits all NIVONA fully automatic coffee machines. Simply put the milk carton inside and let it cool.

- Suitable for all standard milk cartons (1 l)
- Cooling capacity: up to 20° C below ambient temperature and up to maximum 2° C
- Approx. 15 x 31,5 x 27 cm (W x H x D)
- Approx. 2,6 kg
- 230 V / 50 Hz / 23 W

MilkContainer NIMC 1000

Although it does not have its own cooling system, it can absolutely be stored in the refrigerator as well as in the dishwasher: our NIMC 1000 is the perfect storage solution for milk.

- Fresh milk ideally stored
- Made of transparent plastic
- Shows the milk level at a glance
- Capacity: 1 l
- For all NIVONA models with SPUMATORE

Milk Tube Set NIMA 330

Clean tube for perfect milk foam – and in a practical pack of 3. So you always have a replacement for your milk tube at hand.

- Replacement tubes including connection nozzles for all NIVONA models with SPUMATORE
- Pack of 3

CafeGrano/Coffee Grinder NICG 130

Special roasts deserve the correct grinding process. Whether for the small espresso machine or for hand-brewing: With our coffee grinder you will find just the right setting and get the best out of the bean. Also suitable for other preparation methods aside from the fully automatic machine. With this grinder you get delicious, freshly ground coffee grounds.

- Multi-step grinding settings
- Aroma-preserving grinding
- High-quality, hardened conical grinder
- Approx. 13 x 28 x 19,5 cm (W x H x D)
- Approx. 1,6 kg
- 220 - 240 V / 50 Hz / 100 W

Accessories for Coffee Beans

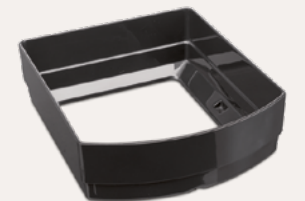

It's all in the settings

With our CafeGrano you can grind your beans perfectly. Whether for the small espresso machine or for hand-brewing your coffee. Freshly ground, full of flavor. And our additional bean container extends your NICR 1040 – up to an entire kilo of coffee beans.

Supplementary Bean Container NIZB 410

Extends the volume capacity of the bean container on our model 1040 to one kilo. It is also very easy to install.

- Container height: 4 cm
- Lid still closes perfectly

The NIVONA Cleaning and Care Range

Because the original works best.

CLEAN³BOX NICB 300

The box for complete cleanliness: With our CLEAN³BOX you get everything you need to clean your NIVONA fully automatic coffee machine in one box: PREMIUM liquid descaler, CreamClean milk system cleaner and our cleaning tablets.

PREMIUM Liquid Descaler NIRK 703

Not only dissolves the limescale, but also binds it. The liquid descaler consistently removes limescale from the fully automatic machine during descaling.

- Highly effective
- Removes limescale without leaving residue
- Gentle on materials and food-safe

Use the CLARIS fresh water filter on your fully automatic coffee machine – this will enable you to descale your fully automatic coffee machine less often.

CLARIS Fresh Water Filter NIRF 700

Your NIVONA filters the water at the same time as it brews – thanks to the CLARIS fresh water filter. For optimal water quality and a long life for your NIVONA.

- Reduces limescale
- Removes chlorine smell and taste
- Filters pollutants, especially metals, heavy metals, drug residues, pesticides and herbicides
- Consists of purely organic material without chemical additives
- You do not have to descale the fully automatic coffee machine as often
- Filter capacity: 50 l / max. 2 months

CreamClean Milk System Cleaner NICC 705

For creamy, fresh foam, you need a clean milk system in your NIVONA. The use of our CreamClean milk system cleaner guarantees this.

- Cleans effectively
- Dissolves and removes fat and protein deposits without leaving any residue
- Gentle on materials

Cleaning Tablets NIRT 701

Lock in the full aroma of fresh coffee every time – by always keeping your NIVONA nice and clean. Simply by using our cleaning tablets.

- Effectively dissolve and remove coffee and oil residues
- Thorough cleaning and and gentle on materials

Clean the brewing unit regularly, but at least once a month. Simply remove it and rinse it under cold water, let it dry and then reinsert it.

Basic Equipment

- 15 bar pump pressure
- 230 V voltage
- 1455 W (NICR 8/9 series 1465 W, NICR 10 series 2700 W)
- ECO-mode
- Pre-brewing system (NICR, NIVO)
- Adjustable grinding degree
- Adjustable coffee quantity (approx. 20 ml – 240 ml)
- Powder compartment for pre-ground coffee (one serving)
- Cable compartment (NICR, NIVO)
- Brewing unit removable for cleaning (NICR, NIVO)
- Control indicator for filter change
- Adjustable to water hardness (4-level)
- Automatic care programme for descaling and cleaning
- High-quality conical grinder made of hardened steel
